

DiMiMED 2026
Medical Readiness – Europe’s Strategic Blindspot?
8 & 9 December 2026 | Koblenz, Germany

Medical readiness is no longer optional.

It is a strategic capability, underpinning security, resilience, and societal stability. DiMiMED 2026 convenes the defence and civilian health sectors to address a shared challenge: **ensuring Europe’s medical systems perform when demand exceeds design and pressure is sustained.**

Why DiMiMED 2026 Matters?

- Modern crises such as high-intensity military conflict, mass-casualty events, climate disasters, cyber disruption, and pandemics expose **Europe’s medical readiness gap.**
- DiMiMED’s 2026 industrial exhibition aims to confront this gap directly, focusing on operationally relevant, capability-driven solutions besides traditional product showcases.
- The conference unites military medical leaders, disaster medical managers, hospital executives, civil protection authorities, EU and national policymakers, and academic institutions in a single, high-level forum.

A Platform Where Defence and Civilian Healthcare Converge

- **Operational realism:** Explore solutions that perform under sustained stress and complex, multi-domain operations.
- **Interoperability and integration:** Align civil-military systems, digital health platforms, and surge-capable logistics.
- **Workforce resilience:** Address training, protection, and automation to maintain personnel readiness.
- **Deployable infrastructure:** Showcase mobile, modular, and scalable medical capabilities.

Your Strategic Opportunity

DiMiMED 2026 is especially designed for **organisations delivering systems, integration, and scalable solutions.** Hence, partners from the industry are expected to:

- Demonstrate solutions in **realistic operational contexts.**
- Engage directly with **clinicians, planners, and decision-makers.**
- Position themselves as **long-term partners in European medical readiness.**
- Highlight **medical capability as a force multiplier**, enhancing operational credibility and endurance and show how healthcare systems function as critical infrastructure under crisis conditions.

DiMiMED 2026 is where Defence & Civilian Health & Healthcare Industry meet to close Europe’s medical readiness gap.

Join us in Koblenz.

Engage. Collaborate. Shape Europe’s medical future.
